Image Compression
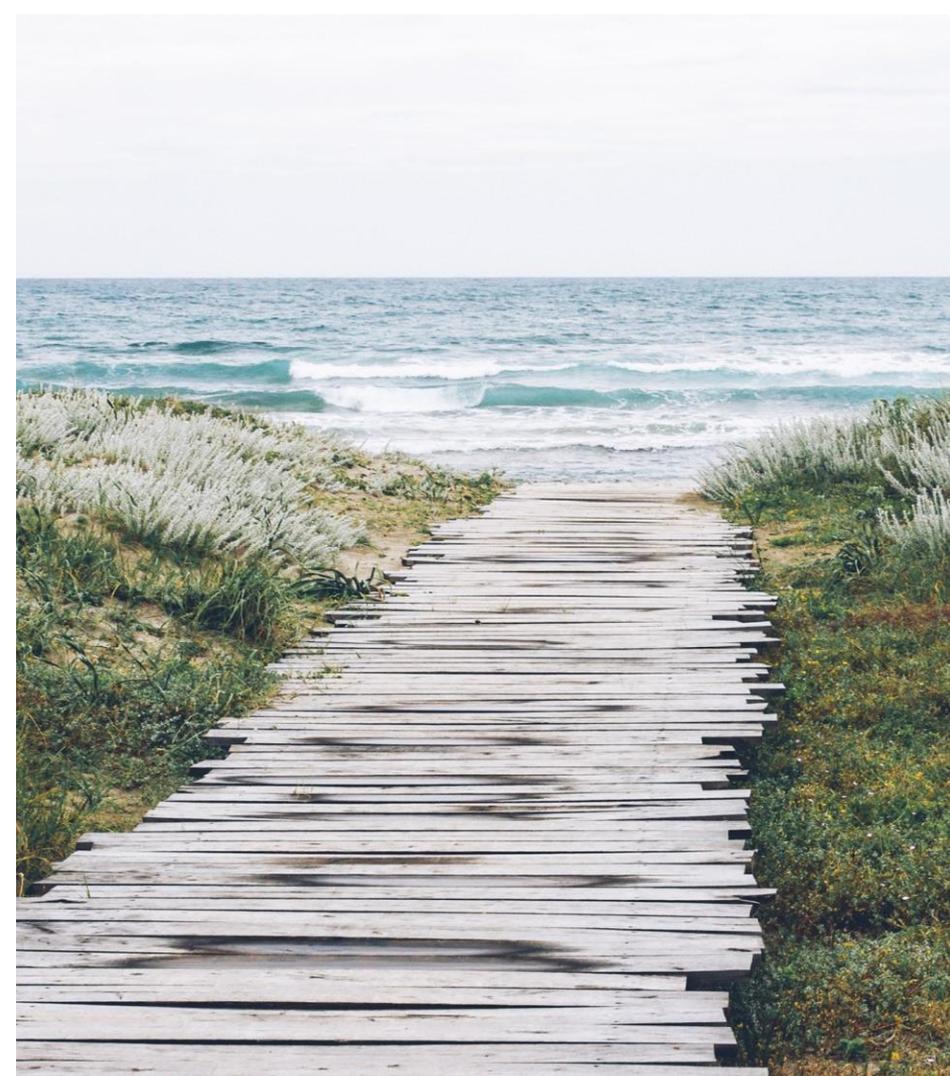

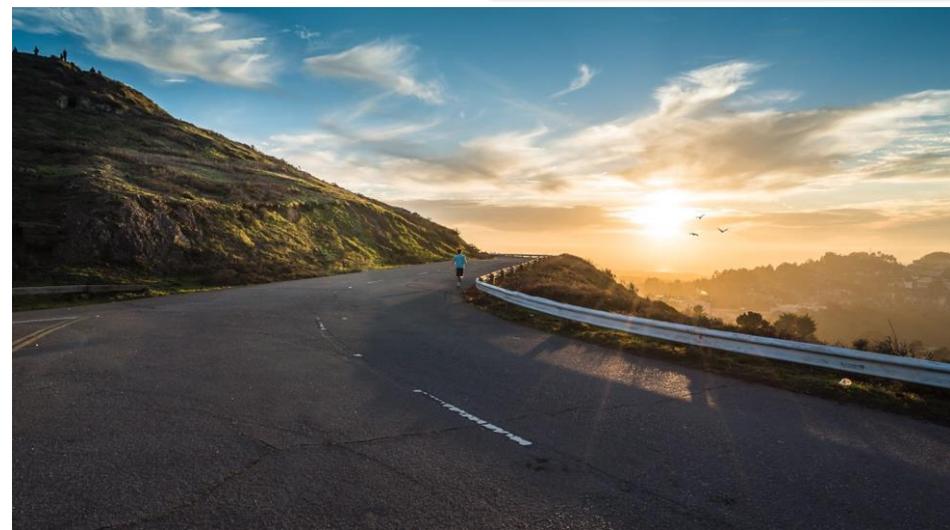

3SCODE • April 2019

What we offer in 3SCODE?

- Image compression algorithm that converts any image to 3SCODE format
- Image display algorithm that displays 3SCODE format
- Image restoration algorithm that restores back the original image
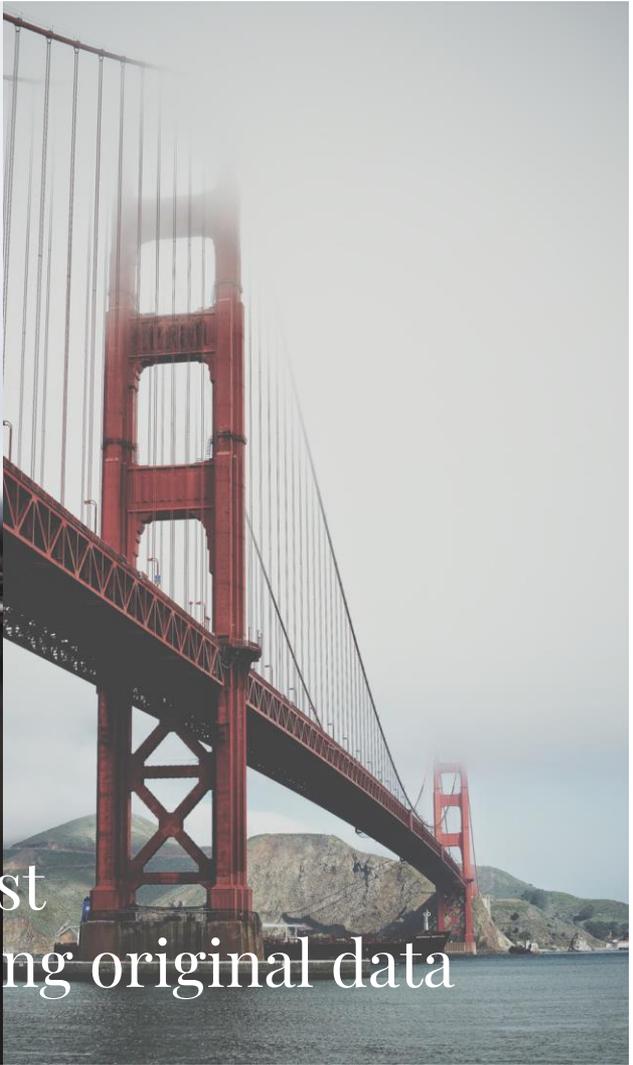

Why 3SCODE?

3SCODE is supporting all Image formats (.bmp, .dib, .jfif, .jpe, .jpeg, .jpg, .gif, .png, .tif and .tiff)
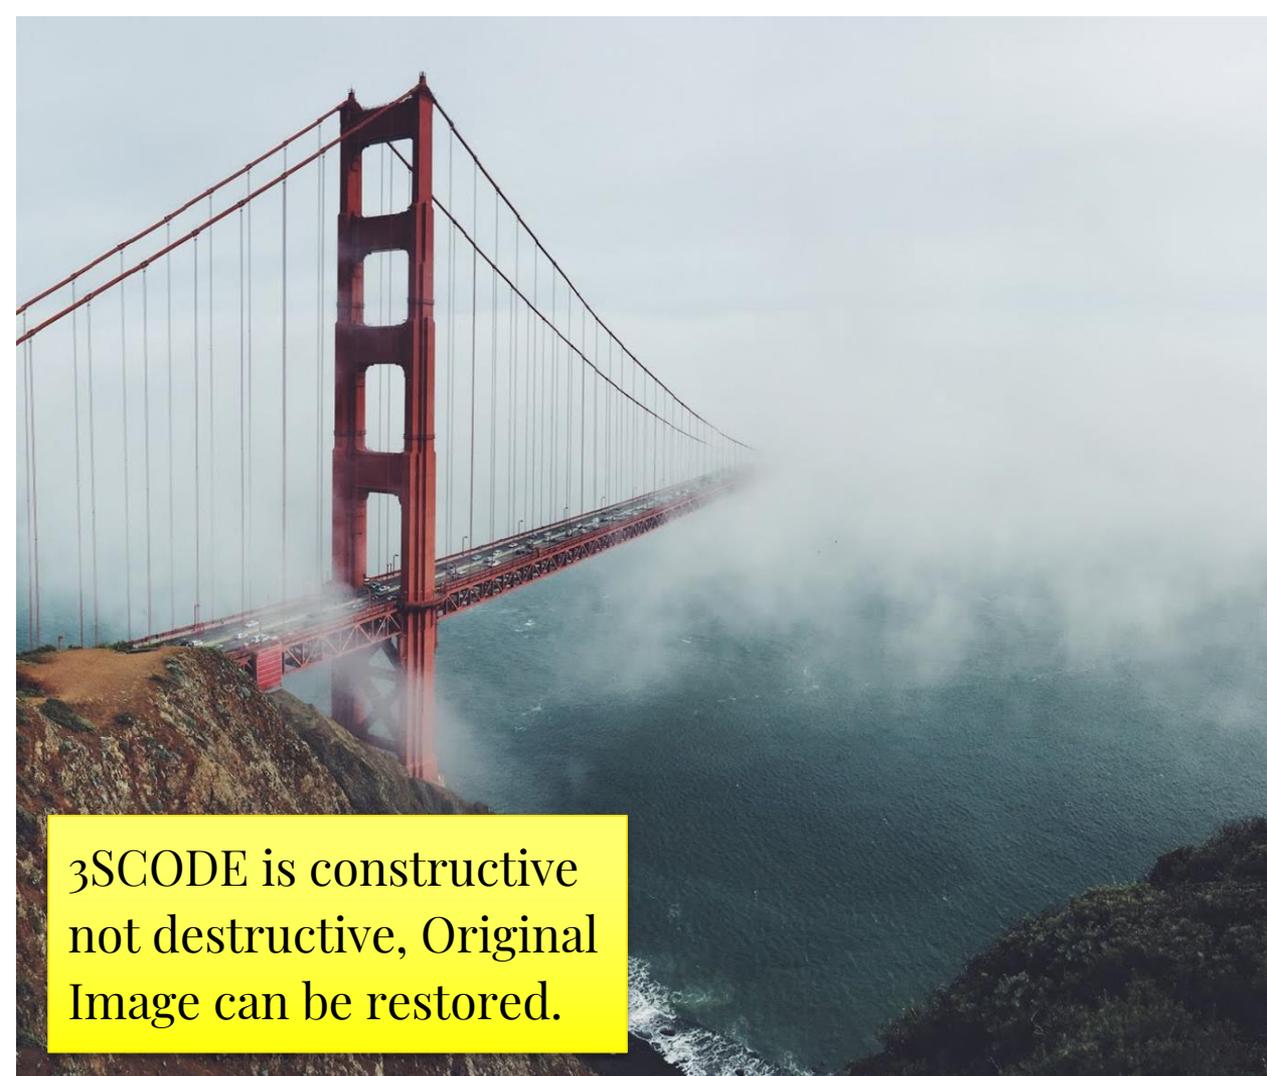

3SCODE is developed in JAVA i.e. it is cross platform and requires only JRE
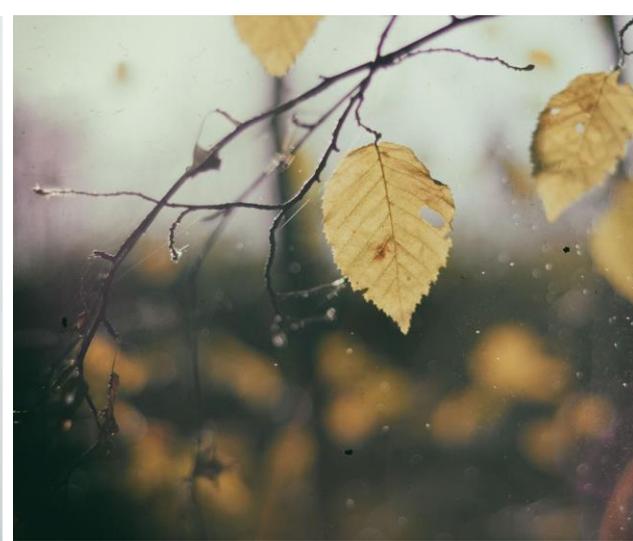

3SCODE is considering Image Quality first
It is compressing Image data while keeping original data

3SCODE is supporting 32-bit ARGB color format

3SCODE is constructive not destructive, Original Image can be restored.

3SCODE is saving 20% to 80% of original image file size based on number of colors. width and height

3SCODE is supporting encryption and expiry i.e. 3SCODE Image files can be displayed only to users having license during certain period

3SCODE is not only for internet browsing users but it targets Image processing professional use like Image Processing Applications, Maps, Streaming, Cameras, Scanners, Printers, Image Recognition, and Sonar/X-Ray Medical Systems, Military services ...etc.
